FILTRATION

Diesel Fuel Filtration Kits

Drivetech 4x4 have added two new vehicle specific diesel filter installation kits. The installation of a fuel filtration kit in your diesel 4x4 will improve fuel filtration and water separation capability, minimising the risk of mechanical damage caused by contaminated fuel.

Installation kits include all of the necessary clamps, fittings, hose and mounting bracket. Detailed installation instructions are also included.

Part Number	Application
DT-FMK017	Nissan D40, 2.5L, Manual only, Spanish build, with Diesel Particulate Filter (DPF)
DT-FMK018	Toyota Hilux KUN26, 2.8L T/D, 7/2015 On

Part Number: DT-FMK018
