ACCESSORIES

Compressor Hose Extension Kit

Drivetech 4x4 has released a Compressor Hose Extension Kit to allow your Drivetech 4x4 Air Compressor hose to reach your caravan or trailer.

This enables ease of use to pump up any trailer tyres that may have had an issue off road, or even just correcting your pressures after an off road trip.

The hose allows an extra 6.5m of length, supplied with a joiner of the same quality snap fitting as the existing kit hose.

Part Number: DT-CHEK
