Drivetech 4x4 Dogbone Strut

Drivetech 4x4 has added to its comprehensive range of 4x4 Brake and Clutch components, an upgrade replacement for the genuine 47613-60020 dogbone struts.

This improved dogbone strut will allow for a more positive hand break activation by increasing the upper shoe fulcrum improving the application of the hand break shoes to the inside radius of the disc drum.

This product is available for popular Toyota Landcruiser models. Check out Gateway for all applications.

Part Number: 072-014720
