AUTOMATIC TRANSMISSION

Date: May 2018

DCT / DSG Dual Mass Flywheels

Now available, OEM Dual Mass Flywheels (DMF) to suit a range of vehicles fitted with either wet or dry dual clutch transmissions.

Signs of DMF wear include visuals such as grease leakage, scores, and discolouration. Driveability issues include noise and vibration.

When replacing the dual clutch assembly, if there is any doubt as to the serviceability of the DMF, the manufacturer recommends the DMF be replaced as part of a professional clutch repair.

Due to many differences between DMF units fitted to similar vehicles, the VIN number is required when ordering to ensure correct part is supplied.

- 23 part numbers in range

Vehicle Manufacturers include:

- Volkswagen
- Audi
- Seat
- Skoda

DCT Transmission Units include:

- DQ250 / 02E 6 Speed
- DQ200 / 0AM 7 Speed
- DL501 / 0B5 7 Speed
- DQ500 / 0BT / 0BH 7 Speed
