

November 2019

Raybestos High Performance GPZ Clutch Pack Modules

Raybestos has released 2 new High Performance Clutch Modules utilising their proprietary GPZ friction material.

- Engineered to withstand high stress, high temperatures and repeated cycling
- Ideal for high stress driving and heavy duty vehicles
- Performance improves as power increases
- Outperforms standard material by as much as 20%
- Improves transmission shift feel and durability
- Greater clutch pack torque capacity

These modules are suitable replacements in:

- Mercedes Benz 722.9 7 speed transmissions
- Chrysler and Dodge A518, 618, 46/47/48RE 4 speed transmissions

| Part Number | Transmission |
|-------------|---------------------------------|
| MCK-90000R | Mercedes 722.9 |
| TCK-48100R | Chrysler A518/618 46/47/48RE |

Part Number: MCK-90000R

Part Number: TCK-48100R
