Vacuum Test Plates

Sonnax Vacuum Test Plates are now available from Drivetech to suit a range of Ford transmissions.

Fault:

A worn valve or valve body bore can result in incorrect pressures in the transmission, which may lead to poor performance or failure of the transmission.

Solution:

With proper equipment, vacuum testing is an effective way to determine if a valve or valve body bore is worn and can also be used after repairing the bore or valve that the repair has been performed correctly.

Using this tool will give you peace of mind that the valve body is a serviceable item.

- Clear test plate and silicone pad seal casting for quick, easy testing
- Open ports at key areas identify recommended test locations
- Easy-to-follow instruction booklet identifies ports, valves, symptoms of wear and the right Sonnax parts for repair

Part Number	Applications
56947J-VTP	Suits Ford 5R55S & 5R55W
95740-VTP1	Suits Ford 6R60, 6R80 & ZF 6HP19, 6HP26, 6HP32 (except for units with separator plate # 053)
